Justjeepsters

I am happy to announce that Justjeepsters will be purchasing jeepstermaninc. They deal with the Jeepster and their operation is very similar to ours. They will keep and operate justjeepsters along with jeepstermaninc as separate websites but same owners. All of Jeepstermaninc inventory will be moved to their Festus MO location. I know many of you have spoken to Mark or John already. They are keeping our jeepstermaninc name, website, and phone number as they are. From the moment we started discussing the possible purchase, we both realized they are the right people to carry on what our family has worked so hard to build over the years. When they visited us in September, I realized how much they love all the Jeep family lines and I saw their passion for our products. They even rented a purple Jeep to drive while they were here. They kept trying to buy my 49 jeepster I'm keeping it. They displayed great respect for our family and what we have accomplished and want it to continue. I can remember when they built and named a Jeepster Commando after my mother. Mark also mentioned how my dad would call him just to check on his son John while he was deployed in Iraq. I am glad that Mark and John are taking this on. Toggle navigation. User Login Sign Up. One of only 2, Jeepsters produced in ? New front disc brake conversion and front shocks from Justjeepsters? New Alternator conversion from Justjeepsters? Lots of new parts such as aluminum radiator, new carb, gas tank and fuel lines? New exterior trim pieces? L-head four-cylinder engine? T96 Three-speed manual transmission and Dana 23 rear axle? Tunisian Red exterior with black interior and red trim? Continental kit with full-size rear tire and wheel? New correct chrome caps? Planadyne front suspension? Underdash heater? Brand new black soft top included This would make a great third vehicle for a family that enjoys the original sport-utility vehicles; it would be a make a fine weekend fun car for a family; or a new prize for a Jeep collector. This Jeepster has a lot of new parts such as a front disc brake conversion, new front shocks, aluminum radiator, new carb, gas tank, fuel lines and new exterior trim pieces. Finished in Tunisian Red, the paint and trim are in overall very good order. The bodywork is straight and solid, the engine bay is tidy and the chrome bumpers are in great shape. Out back is a Continental kit, complete with a full-size rear tire and wheel. This Willys rolls on gum-dipped Firestone Deluxe Champion wide whitewall tires, size 6. Each tire is mounted on a steel wheel with red beauty rings topped with correct factory chrome caps. The tires are in good condition while the wheels are excellent order. Under the hood is Willys? It is backed by a T96 three-speed manual transmission and a Dana 23 rear axle. The Interstate battery is in very good shape and the generator has been upgraded to a alternator. Other mechanical features are a Ross cam and lever steering, independent front suspension with single leaf spring Planadyne and semi-elliptical rear springs with torsional stabilizer bar. This Jeepster rides on a inch

wheelbase and stops with new front disc brakes. Inside, the Jeepster? The black carpet is in very good order. A two-spoke steering wheel faces the driver while the red, metal instrument panel has a full suite of ancillary gauges, however there is a more modern, auxiliary temperature gauge mounted beneath the dash. The inner door liners are in very good order. The original soft top bows are in good shape and is included with a brand new black soft top that can be installed for an additional charge. The basic Jeepster included numerous deluxe features and interior fittings in addition to a high level of standard equipment that cost extra on other automobiles. These included, among many others, whitewall tires, hubcaps with bright trim rings, sun visors, deluxe steering wheel, wind wings, locking glovebox, cigar lighter and continental tire with fabric cover. The Jeepster had Willys? World War II-proven straight-4? Go Devil? The Jeepster's engine is coupled to a three-speed manual transmission with standard overdrive. The Planadyne single transverse leaf spring independent front suspension, entire drivetrain, front end, rear suspension, steering and four-wheel drum brakes were from the Willys Station Wagon. The flat-topped rear fenders were taken from the Jeep truck line. The Willys-Overland Jeepster, borrowing features from both the Willys Station Wagon and Truck, attempted to bridge the gap between the? Following the end of WWII, the Willys-Overland company chairman recognized the importance of expanding its offerings to include a civilian passenger car and with the help of industrial designer Brooks Stevens, presented a model more likely to appeal to younger market segments. The original Jeepster VJ was first released to the public on April 3, If you? Why not drop by MotoeXotica Classic Cars today and look it over for yourself? VIN: This truck is currently located at our facility in St. Louis, Missouri. Current mileage on the odometer shows 2, miles. It is sold as is, where is, on a clean and clear, mileage exempt title. Note: Please see full terms and conditions listed below that pertain to the purchase of any said vehicle, thank you. Similar Vehicles. This Willys Jeepster for sale has a c. The truck was reportedly stored from the s until and was acquired four years ago by the seller, who operates a Jeepster shop. The exterior is finished in white with a turquoise soft top over a matching interior. The ci V6 is paired with a three-speed automatic transmission and a dual-range Dana transfer case, and additional features include front and rear Dana axles, turquoise side pinstripes, a Hoffer Morton emblem, and a rear-mounted spare wheel. Service under current ownership is said to have included disassembly and reassembly of the engine as well as replacement of the water pump, carburetor, spark plugs, ignition wires, and more. The exterior is finished in white with a turquoise soft top and a matching cover for the spare wheel. Turquoise pinstriping and a Hoffer Morton dealership emblem reportedly were added by that dealer. The seller notes that the paintwork is dull from age and shows areas where over-buffing has exposed the primer, and corrosion is noted on the tailgate. The interior features turquoise vinyl upholstery that extends from the front bucket seats to the rear bench, console, dash pad, and door inserts. The matching carpets exhibit stains. A two-spoke steering wheel sits ahead of a body-matching steel dashboard with a radio and factory instrumentation. The odometer shows approximately 6, miles, about of which have been added by the seller. The ci Dauntless V6 is finished in blue paint and was factory rated at horsepower at 4, rpm and lb-ft of torque at 2, rpm. The seller reportedly disassembled and reassembled the engine and also replaced the water pump, fuel-filler tube, spark plugs, ignition wires, and distributor cap. A Rochester 2G two-barrel carburetor has been fitted, and the removed components will accompany the sale. Power is delivered to either the rear or all four wheels through a three-speed Turbo automatic transmission paired with a dual-range Dana 20 transfer case. The seller states that Dana 27 and 30 axles are equipped in the front and rear, respectively. You're the high bidder. February 18, at AM PT. For more information go to Interesting Stuff about the Jeep Jeepster The Jeep Jeepster was the last vehicle manufactured to sport a true phaeton design, which is an open automobile style. The Jeepster was manufactured by Willys-Overland Motors from to When World War II ended, Willys started creating a civilian Jeep or CJ to cater to a new market since the military-type Jeep would most likely appeal only to farmers and foresters. Willys produced a Jeep Wagon and eventually a Jeep Truck. The Jeepster was built to fill in the gap in the Jeep family. It was a crossover from the utilitarian truck to the passenger vehicle. Compared to the Ford vehicle that featured a V8 engine and some fancy styling, the Jeepster had a 4-cylinder engine and plastic-side curtains. Automotive critics and journalists liked the boxy styling of the Jeepster, as well as its performance. Standard features on the previous model year became optional at an added cost. Original VJ Jeepsters sold a total of 19, units. The model sold around 10, units, while about 2, units were sold for the model, and 5, for the model year. Production then ceased after The early Jeep Jeepster was known for its bold styling and praised for its performance. Some users have encountered problems with steering. Upon inspection and repair, some of the steering issues have been attributed to improperly torqued bolts that secure the steering gear assembly. Steering loss may result from this as the assembly loosens up from the frame. The bolts must be re-torqued to fix this steering issue. You may also want to check the universal joints on the steering gear assembly for cracks or fractures. When restoring or buying an old Jeepster, you have to check the condition of the hood latches, linkages, and locks. If they are already rusty, loose, or broken, replace them as soon as possible. Jeepster owners have reported this to be among the common problems of this vehicle model. Problems with the vehicle speed control and accelerator pedal have also been reported by owners. Some have noted that their accelerator pedals tend to stick and touch the floor console through the arc of travel. Upon inspection, this can be modified. Consult the vehicle manual or have this checked by a certified mechanic. One of the most common sources of rear suspension problems on the Jeepster is the rear axle bearing. Some have noted bearing failure that could easily compromise the rear wheel and axle assembly. This can be fixed through proper bearing lubrication. See to it that you use only high-quality lubricant to make sure that the bearing will work smoothly and will be in its prime condition. My Jeep Jeepster is almost 5 decades old, so I'm no longer using it as often as before even though it still runs well on well-paved roads. I'm thinking of getting it a bubble storage before winter kicks in. Is it worth the price? Not everyone is as lucky as you for having a Jeepster in your garage until now, so if you intend to show it to your friends and visitors even while in storage, then an indoor bubble storage system might be worth it. This storage system basically protects your ride against all kind of enemiesâ€"dirt, dust, rodents, scratches, water, and moistureâ€"without keeping the vehicle out of sight. A capsule or bubble storage usually has two partsâ€"the heavy-duty plastic floor and the clear plastic bubble. These two parts are joined together by a zipper, which keeps the vehicle enclosed when zipped up. The bubble is inflated by turning on the fan that's installed one end or corner of the storage system. If you want to free your car from it after the winter season, you can simple unzip the bubble cover, take it off your Jeepster, and drive off. I always use clay bars when detailing my Jeep Jeepster. The last time I did, a friend told me to try paint cleaner as it will make paint surface cleaning faster. Is that true? What's the difference between clay bars and paint cleaners? Both of them can rid your car's paint of contaminants, but they do such task in a different manner. The clay bars eliminate contaminants from your Jeep's paint by enveloping them inside the clay bar material. They work even on contaminants that are embedded even below the paint surface. The cleaners, on the other hand, work only on the paint surface, but they are great for stubborn dirt. If you're after the time spent in cleaning the surface, paint cleaners are easier to use since they come in liquid or wax forms and can be applied using a terry cloth, foam, or microfiber applicator pad. It is important to note, however, that even if you're using cleaner waxes, both the clay bars and the paint cleaners can't substitute proper waxing. They just leave your paint surface clean and smooth so that wax can adhere better to the paint and thus provide it with maximum protection. My Jeep Jeepster is now spending more of its time on my garage, drawing out second look and admiration from passersby. I am still starting it up every two weeks just to prevent some components from failing. Am I doing the

right thing? Any additional tips you can share? Yes, it is advisable that you start up your car regularly to keep it in good running condition even if you're not driving it often. Make sure, though, that you let your engine get to its normal running temperature before turning it off. And if it is at all possible, go take your ride for a spin even for just a few miles. Doing so will help prevent problems like sticking brakes and clutches as well as failing hydraulics. We've Made a Site Update. Refresh to the latest version.
