Hill, who is connected with the development work on the iron properties at Kitchener, hail a tulle the other day with a representative of the Nelson Tribune ami says that good progress is being made on the property which is now under bond to the Montreal syndicate made np chiefly of C. R officials. He ia at at present working a crew of 45 men in exploring the iron deposit by means of diamond drill borings and by surface work. The drilling has so far been in very hard rock, but last week exceptional progress was made. Tbe ledge has now been proven for a depth of feet aud the cores show a very high grade of hematite iron. The syndicate holding the bond upon the property have a very heavy payment to make next moiith and tbe development is being pushed ns rapidly as possible la order to prove the property up as much as possible before the payment becomes due. The properly was thoroughly inspected tbis week by A R. Rose, who has been employed by tbe holders of the bond, and tbe work uow being doue is iu line with his directions. He has taken extensive samples from the ledge aud the nature of his report is being awaited with great interest by the local shareholders the property, of whom tbe London and British Columbia Gold Fields people are tiie most heavily interested. Work is being continued rs usual, but it is generally understood that tbe bond will be determined very much by the work which has been already performed. From the report which Mr. Rose is now preparing will in n very great measure depend whether Kitchener will have the extensive steel industry which it was predicted would follow the successful de velopment ofthe big iron ledge. Past experience has demonstrated that in most instances tbe iron deposits in Kootenay lose iheir commercial value with lepth. Tbis rule seems to bave been broken with respect to the development uf the Kitchener deposit, but it remains be seen whether it has developed sufficiently well to meet the requirements of the Montreal men, who aim to establish at Kitchener an iron and steel industry which will he second to none in the Dominion in point of size. Improving On Nature Is one ol the unctions of the tailor. By his art he makes up for deficiencies of shoulder, chest, etc. It is our business to do that, and more. We not only make perfect fitting garments which set off a good figure and improve a poor one, but we put material in our suits which some tailors would not think of selling at less than double our price. George Lamprey lias quit prospecting for a brief spell and gone to Washington for a vacation. Phoenix shipped over , tons of ore the first six mont s of this year. Phoenix is a winner. Robert Johnson came up from Moyle Monday, and has gone lo Perry creek lo do some assessment work on his property in that district. James Hickman, oneol'lhebest known miniug men aud prospectors in the district, has been secured by Mr Mott, ol the Pekin claim, to prosecute the development work on that property. Stratton's Independence mine mnde another great output during May nnd will do better in June. If the foot wall of the fault is struck it must be passed through and the driving continued on the loot wall ofthe faulted vein. What the Le Roi needs is better management and less stock jobbing. All of British Columbia has to suiter from the deplorable manner in which the affairs of this rich property is being bandied. Upper St. At lhe headwaters of lhe St. Marys lies one of the best undeveloped properties in Smith Kast Kootenayi the Commonwealth. Proctor recently made a Lt ip there, and the Nelson Tribune aaya that as a result of their inspection tbe managing director has let a contract to the Johnson brothers of tbat city for lhe driving of a foot tuunel tbe Commonwealth ledge, which, it is expected, will show the property up in such shape that regular shipments will be made from il. A considerable portion of the company's stock is held in Toronto, the holders of which bave obligated themselves to perform the necessary development work. Such work as has been done on the Commonwealth shows the ledge to be about 12 feet wide, two feet of which carries high grade ore, with values in gold, copper, silver and lead. The tunnel which has now been contracted for will he run so as to come in uuder a foot shaft which has already been sunk upou the vein. It will be driven in upon the ledge, and tbe management hopes that it will disclose a sufficient body of ore to warrant ship" ments. By this process it is expected that nearly all the values will be secured aud a considerable saving elected iu the tonnage shipments. Iu the event of this process being follow Tke C. Did Craabrook sad Fernie a Oood Turn. Late last Friday eveuing it was discovered tbat the regular train on tbe main line was ten hours late, and that the local that was to be run on the Crow was three hours late. That meant that the Fernie boys could not get lo Craubrook in time for the lacrosse aud football games, and the largely advertised

contests would have to he culled off. A committee went to Chief Dispatcher Walker at p. There was no train scheduled out ot Fernie, and no train east to come along during the day. The proposition was a tough one. As a result a special left Fernie at one o'clock, bringing the crowd iuto Cranbrook ou time. It was a nice act, promptly and courteously doue, aud wns a great favor to the towns of Fernie nnd Cranbrook. Furthermore, it demonstrated that Superintendent Bury is ready to meel the people since he has heen in charge of tbis division, and he has gathered about him the right kind of a staff. Kveryone living iu this part of the country should put their shoulders to the wheel and help to make the exhibition a grand success. The Free Press is evidently desirous of creating the impression that Fernie is about the toughed town in British Columbia, The people of Kansas, under direction from the governor of the state, held public prayers for nil tl during the drouth. Now that strikes lis as very strange. If the Lord controls directly the rain, he surely meant to give the people of llial slate a. If he don't control it directly, nil the prayers in Kansas would not change the situation. A ceutury ago such a proceeding would have seemed natural, but not iu this advanced age 'of Civilization aud intelligence. We have seen the second number of Lowry's Claim, and to be frank ahout tt, we are greatly disappointed. Among the Fernie people who attended the foothail and lacrosse game; in Cranbrook last Saturday were the following: Mra. Scram, Mrs. Keid, Mrs. Peters, and Messrs. Lyons, W, Johnson, S. Sbannihan, F. Wallace, W. Tutes, C. Dunlop, Harry Haines, W. Hyson, ti. Duiiu and P. Ou the fourth of July a British steamer nnd an American man-of-war lay at anchor in the harbor nt Skagaway. The American gnu boat wns fully dressed in bunting in honor of the day, The captain ofthe British steamer, desiring to show courtesy to the land, had the Union Jack and olher flags of the British nation flung to the breeze from hia mast head A United States commissioner, clothed in a little brief authority, saw tbe Union Jack nnd senl a deputy sheriff aboard to ordered it pulled down or take the captain to jail. Naturally tbe captain resented the idea, but to save himself incarceration, he complied with the request, After the departure of the sheriff he visited the United States gun boat and staled the case. The naval captain ordered out bis gig, took a crew of Yankee tars lo the British ship, pulled the Union Jack to its place, and returning to his own boat, had the British flag run up to bis foremast, mannned the guns and fired a royal salute. In this way was a severe rebuke administered to a petty official who had violated a sacred code oi marine ethics, and, through ignorance nud bigotry, insulted a country that stands as one of the United States' best tlends, It is easy to find a man who knows just how to run a newspaper. The woods nru full of litem, and the ones who have the most to say in criticism are the ones who would run a paper for one object Alone. We would like to see some of Tbe Herald critics take the job for alwut four weeks during these times. The trouble with the average man who knows how n paper Bhould be run, but never ran une, is that he imagines the world is wnitiug to hear his opinion on bis bobby whatever it may be. Some have one idea, some another, but not one of them stop to consider that a newspaper is for all clasies of people, and to be a success financially it must meet the demand made upou it. Nortli Star The Herald haa ofien aald that over- capitalization and slock manipulation hail more to do wlih the failure of gooil properties In British Columbia than all other faclorg combined. Take the Hoss- laud trouble for Instance. Properties lhat were purchased for , and , were tloateil on ihe London mnrket at the unreasonable sums ot 12,, and , Aud lhen followed a game of stock manipulation that was a disgrace to the business circles of any continent. What haa been the result' While promoters were getting unearned anil unprecedented rakeofTs, the stock was Buffering and legitimate mining getting a black eye. It is not the mines or the labor unions that are causing ttie trouble. Other properties lhat are not near as rich, that are being properly handled arc producing good dividends for the ibarebolders, and avoiding trouble with lhe labor unions. But lhe policy ol Admitting that the mining laws of British Columbia are not by any means perfect, have tbey Inlilcted the untold Injury to this province done by the rottenness ai, This Is a phase of the difficulty which should be fully understood before anyone attempts tu pass upon the prospective merits of tbe two parties to tbe labor dispute In thc Kossland camp. It Is not solely a question of wages. It cannot be because the advance demanded by the muckers In the Le Roi would not amount lu a year's operation to over iJROOO, and the owners of the Li Roi are supposed to have over ,, worth of ore lu sight In their property, which only requires the labor of tbe miners to make it mat lie table. This cuts clear Into the quick on the question. It states bare fads, and the sooner the people of British Columbia and the outside world appreciate the situation, the better it will be lor all concerned. Such policy as has been pursued with some ol the leading Ross land properties would close up the best mines on the American continent. I sat watching them till daylight came, nnd then we all went down to the beach. The tide was coming in, but we found tracks, as before. While we were hurrying about, arguing nail discussing, the tide brought in the naked limb nnd foot of a womnn. It hnd beeu torn from the body by the sharks, nnd it was the foot which bad made the tracks in the sand. One of my shots hnd struck and killed her as she swam uwuy, nnd the blood hnd brought the savage sharks to the attack. There lay the Hnih beforo us, Willi the flesh hard and firm, though showing a bruise here nud there, but no ollier part of the body enme ashore. To whom the limb had belonged, how she was cast awny there, where she was biding, why she did uot seek our protectionâ€"none of these questions cnu I answer. Wc burled the limb in the sn mis and beard no more of the nymph of thc sea. A Wumlerfal Shut. And a man, having the biggest nnd deepest aud widest drawer assigned him, will throw luto it three socks, a collar box, nn old necktie, two handkerchiefs, a pipe and a pair of braces, and to save his life he can't shut that drawer without leaving moro ends sticking out thnn there nre things in it, and it alwnys looks ns though it bad beeu packed with a hydraulic press. The Man and the Mon. The Hon didn't even offer to touch me. Looking back to bin own experience of forty years, he could recall the time when Hle Northwest wus indeed a wilderness, for at that time, instead of comfortable 'farms now to be found everywhere, thero were practically none except u few at the Hudson Day Company's posts, while tho country for enormous distances was black with in iff uio, of which none now mutinied. In the course of his paper Mr. Mac- Dougall said that while the Great Dominion of Canada as a whole might be said to be one of the brightest gems in the diadem of the British Empire, Northwest Canada might be called the gem of the Dominion, it represented a block of territory 1, miles square, or Not only was the soil prolific under

cultivation, but oven without cultivaton the whole area had been richly endowed by nature as one of the greatest pasture lands in the world, while everywhere the moisture waa sufficient. The settlement that had gone on during the last quarter of a century hnd heen but tbe beginning of the exploiting of tremendous possibilities, which continued dormant because of the tuck of population. Contiguous to and underlying these great agricultural and pastoral advantages were immense coal fields, possibly Hie largest as yet discovered in the world. Gold was found in thc sands of ths streams, and gold, silver nnd copper were in the quurtz ledges of the mountains, though the area of the prospecting and discovery of these mineral deposits was so great that as yet comparatively little bad been done. Almost everywhere, too, was abundance of water-power. It might, also, be regarded as an excellent lield for the tourist. Inasmuch as the scenery within the foothills and the mountains was surpassingly grand. Another Important consideration wns that all this rich country was in touch with the home markets through British routes. These lands are readily accessible by the Crows Ncsl Pass Railway. UMI J. Mark, 2 : 27, We have for our meditation this even ng a subject which is being discussed by 1 large portion of the religious world, and upon which there nre many varying opinions. Iu this, as iu other matters of public interest, there are those of extreme views on both sides of the question. Some would relegate the Sabbath to the past anil observe it as a day for recreation and pleasure-seeking only. Others, hy surrounding it with phaiisai- cal rules and regulations, would make il joy looked forward to with holy awe and dread. A man who holds moderate views is apt lo incur the ridicule of one and the severe criticism and eveu the personal abuse of the other. It is to be deeply regretted that there are those who refuse to consider these great questions appertaining lo the public welfare, from n rational standpoint, for very frequently the cause they advocate is in jlired rather than promoted. There is doubt but thnt the tendency of the world today is to encroach upon the Sabbath. This is to be deprecated, for, although I do not hold any Puritanical views regauling the observance of tliat y, I iii in ly believe that with the prestation of the Sabbath to its proper uses, it closely associates the vital interests of the individual and of the nation. I hold that the people of Craubrook iire, on lhe whole, a Sabbath observing people. There are doubtless individuals who do not pay proper regard for this holy day, but generally speaking, our citizens are God fearing and Sabbath loving. I have knowledge of several towns in this province, aud of many in the eastern provinces, and iu none of them is the Sabbath belter observed than it is in Craubrook. So far as I have observed, except iu individual cases, work is suspended, sport and pleasure is not indulged in uud the cliinches are well filled with devout worshippers. I believe it is a great mistake to try Lo compel men to be moral. Men are hoi doing God's service by fixing rules for their fellows, and trying to make them obey these rules. A religious ordinance is robbed of all its glory when men are compelled by law to observe it, A human being, who is not n voluntary agent, is not a man in lhe true sense of the word. A man who is not moral vol untarily, is not moral at nil in tiie sight of God Tin: Pharisees are examples of men made moral by rule and legislation. They were the "by pot-rites," the "whtted sepulcliers" of our Lord's time, and as such weie bitterly condemned by llnil. It is upon ihis principle our church lays down no rules fur ber members. She instincts iu the divine woid; she administers; she eutreais; but tlie does not eonipel. With respect to closing our saloons on Sunday, I bold that unless mea be persuaded that il is wiong to drink intoxicants on Sunday, the saloon doors had bettlr he open. A man demeans bim self who goes behind a bar room door lo drink, and he will do thi-: if he cannot di lnk openly. I do not for a moment condone lhe violation ofthe law, hut the Sunday closing law, not only iu this province, but Ill the eastern provinces, is practically a dead teller and shoil-d tie removed bom lhe statute books, Let us uow study llie quesliou of Sunday observance in the light ol holy Scripture, On Sunday our Lord, witb his disciples, was walking along a path through certain cornfields. The disci pies, being hungry, plucked some of Hie ears of com to cat. The "law-made re ligionistn" whom we have referred tothe Phariseesâ€"questioned Jesus as to why he allowed bis disciples to do that whieh wus not lawful on the Sabbath day. His reply embodies the principle- underlying all rational religion, "I will have mercy ami not sacrifice. The Sabbath was made for man und not man for the Sibhath. That is to say, the Sabbath is not an institution made to re strict men's freedom,

thereby being a grievance to them, but un institution made for their benefit and designed to he a great blessing. The Pharisees bad hedge 1 the Sabbath about wilh so many rules aud regulations that it had become a burden. The slim- literal interpretation of the law that to day forbids a woman using a needle on the Lord's day, although she may safely use a pin than forbade the wearing of u bow on tbe dress, unless it was sewed ou, thus becoming a part of the dress becnuse she would be carrying a burdei otherwise. So, too, a man injured 01 the Sabhiih day could not have hi wound dressed because that wnuW tie labor. It was this extreme literalism that the Lord condemned and he en delivoted to teach tbem that they were to be guided by the spirit or luteiitb n of law rather than by the letter. The Sabbath law rends, "Upon this dny thou shall do no work," and the Pharisees believed that the man best obeyed the law who did the least work. Christ says the Sabbath, like all the creations of God. Starting with this interpretation of the law it is not difficult to draw our conclusions as to how the Sal bath Bhould be observed. To promote the welfare of man. Any man who has the true conception cf himself will say that the spirit or soul is tbe essential part of man. Therefore, that which lends to promote the welfare of the soul is the most essential part of Sabbath duty. Reason says lo us, ' I am not merely a merchant, or a median ic, or a doctor or a lawyerâ€"I am a man I have an immortal soul. I must take advantage of every opportunity I have for promoting the welfare of my soul. I cau go to God's house and engage in prayer and praise. Not ouly cau I think about myself, but I can think about othersâ€"my fellow men and their needs, and perhaps by helping tbem I can do good service, and so prepare myself for serving Him iu the heavenly kingdom. Man, the machine of machines, is repairing ami winding up, so that he returns to his labor on Monday with clearer intellect, with livlier spirit and with renewed bodily vigor. Repose, not inaction; rest, not torpor. What promotes a healthy rest is in harmony with the Sabbath: wbnt hinders it ia alien to It, A tlay speut wholly pleasure seeking and excitement is not a day of rest. Tuke two men, one spending bis Sunday in search uf mere enjoy men t, the other spending it quietly in the midst of his family, at church, taking a quiet walk or drive, doing some little service for Christ; which of the two is more rested, sooilnd, fitted for Ilie labors of Monday morning? If you have tried both, I lay not the slightest doubt ns to what your answer will he. The Sabbath was made for man. It wiih designed to be a means to an end. Man's interest is that end. It owes its existence to man and hns a reasou for its existence in man, It Is a memorial of his creation, for it was then the Sabbath was instituted It js a remembrance of his redemption, for upon this day Chi ist rose from the dead, "fi s fruits of them lhat sleep," and it is a forecast nud pledge of his future and everlasting rest. Let us earnestly pray God for a knowledge of his will iu this and in all matters appertaining to His kingdom, for a hearty desire and determination to do the same. The Herald predicted its early demise, when it lucteased its expense beyond its apparent income, There is no use running a champagne paper a lager beer town.
